Certified NLP Training

The Worldwide Institutes of NLP

Since 1994, NLP Worldwide has been providing NLP Certification training and Coach Certification globally. As long-time leaders in the field of NLP, you have found the right place to call your NLP home.

A Note from Dr. Heidi

Hi, I'm Dr. Heidi Heron PsyD. I'm one of the Principal Trainers with the Worldwide Institutes of NLP. I am also an International NLP Master Trainer, Doctor of Clinical Psychology, Master Certified Coach, and Level 4 Counsellor.

Since 1994 we have been training the skills of Neuro Linguistic Programming for personal and professional outcomes. While our topic may have stayed the same, the courses have transformed over time, and we would welcome you to join us in one of our upcoming trainings.

While you look for your NLP or Coach Certification trainers, keep an open mind about timing, location, and your personal intentions. There are a lot of training organisations out there, unfortunately not a lot that stand the test of time with regards to integrity, outcomes, standards, ethics, and credibility.

As you navigate through our offerings, I invite you to jot down a few questions and then let's set a time to chat.

If you are serious about learning NLP, then I want to talk with you to see if our course fits your needs.

I hope to speak with you soon!

Regards,

Dr. Heidi Heron

Why Learn *with* The Worldwide Institutes of NLP?

First, notice the word *with*, instead of from. You will learn *with us*. We use the skills of NLP to train NLP – while this may sound commonplace, it unfortunately is not. In nearly 3 decades of training NLP, there have never been two trainings that are the same! We cater to who is in our training room and adapt accordingly. Learning NLP with NLP Worldwide is a full immersion experience. Our interactive and generative learning offers you an experiential learning experience There is no absorbing information while it is lectured; everything you are taught, you will try on, experience, experiment with, play, learn, and develop a competence for.

We pride ourselves on quality learning, connections, and outcomes. As such, we cap all our courses at 20 participants and the amount of learning opportunities *after* your classroom training ends is phenomenal. We want you to get NLP into your muscle, not just *know* NLP. Additionally, the conversational style of our trainers blends their decades of experience with their wealth of knowledge. Your questions are answered from intimate knowledge of using NLP every day, support and feedback is provided for practical application, and your personal growth is nurtured for you to achieve your desired intentions and outcomes.

It's Different Here

Our trainers just don't train NLP – they use it every single day personally and professionally. While this should be commonplace, unfortunately it's not.

Our passion for NLP lies less in the techniques of NLP and more in the people who learn it. We have experience with NLP in the classroom, and more importantly out of it.

We use NLP every day. First - in our own lives and second, with others. Our trainers are all actively using NLP as a tool for Therapy and Coaching with individuals, families, and groups. They also work with companies to assist their leadership team, sales professionals, human resources department and more.

All this information is brought to the classroom, sharing practical, not just theoretical application of NLP.

NLP WORLDWIDE FOCUS STATEMENT

NLP is a tool that is best applied first to self, then others. In our training we endeavour for all of our skills to be shared at three levels :1) use for self, 2) use within business, 3) use with others. With this mix, our students learn not just the tools of NLP, but how to use NLP in an everyday context to improve life in all ways.

NLP ASSOCIATIONS

The NLP Certification Trainings with NLP Worldwide meet the international requirements for NLP training with most boards and associations globally. We are aligned and recognised by The NLP Association of Australia, NLP Association Singapore, and NLP Association (UK based). Additionally, our trainings meet the requirements of The American Board of NLP, NLP University, and the Institute for the Advanced Study of Health.

COACH FEDERATION

Our NLP Coach Certification meets the gold class standards of the top Coaching Associations in the world. We are members of **the International Coach Federation (ICF)** and the Association for Coaching. The full NLP Coach Certification program is an **Accredited Coach Training Program** with the ICF. We uphold and maintain our training and ethics standards to ensure our students who are helping others can do the same.

The Key to Success

Choosing your NLP Trainer is important business. You want to make sure your trainers walk their talk and will support you in how you want to learn NLP.

At NLP Worldwide, your success is our success. Regardless of if you are looking to use the tools of NLP for your own personal growth, as a Coach or Therapist or within your career or workplace. We will meet you where you are at, to assist you to elevate your skills in the way you desire. Your Trainers Dr Heidi Heron and Laureli Blyth are avid learners and bring their world of NLP into the classroom so you will be learning not only the theory of NLP, but practical use of these dynamic tools in daily life.

INTEGRITY

We share the knowledge of NLP and treat all our students with the integrity it deserves. Any tool as powerful as NLP can be used with impure intentions. It is our aim to only teach and share integrity within NLP.

RESPECT

Not only do we teach our students to *respect other people's model of the world* (an NLP Presupposition), but we also do the same. Respect of an individual, respect of our tools, and respect of NLP is important to us at the Worldwide Institutes of NLP.

INNOVATION

While the content stays the same, our innovative approach makes it new every time. We are on a path of continual improvement, which has led us to increase our use of technology in our pre- and post-course learnings and continual improvements and updates to our training materials.

AUTHENTICITY

What you see is what you get with us. Our trainers are real people, using the skills in their lives to live their best life. Still, they are not perfect, nor will they ever claim to be. We strive to help all our students take off their masks, remove their cloaks of invisibility and learn to truly live as their authentic self.

What Our Students Say

DON'T TAKE OUR WORD FOR IT

Our students use words like **integrity, passion, supportive, down-to-earth, real, approachable, and authentic** to describe our trainers and training. While we may not put on a 'good show' (with loud music, lots of clapping, lights, and cameras), we do provide an outstanding NLP training opportunity.

The path of choosing an NLP trainer can be a tricky one simply because you have nothing to compare with. Therefore, we'd like to share with you some of the things that students **who have previously trained with another organisation** and then **re-train with us** have to say.

Catherine - You can do a seminar with anyone and get a manual and some practice. With the Institutes you will get knowledge and the information will go into your bones. The small groups, accelerated learning, real life application and teaching style of Heidi and Laureli without a doubt is what makes their NLP training superior to the others. If you want to be a Coach - this is the only training you'll need!

Michael - I thought my first training was great, and it was. My training with Heidi and Laureli however surpassed it by their approachability, knowledge, and practical use of the skills. I can ask them questions, send emails, get further clarification, and continue my learning outside of the classroom. I learned so much more, have more knowledge about how to apply it and know that I can do it in my way not someone else's.

Claire - Thank You NLP Worldwide for introducing me to REAL NLP!! After spending thousands and thousands of dollars training with several of the leaders in the industry of NLP Training, I have finally "come home"! What a pleasure it has been to re-learn the fundamentals of NLP and how to use these skills in ways that create meaningful change and build resources in my clients that will last them a lifetime. I have learnt that true NLP is about "doing with" not "doing to".

Peter - I found the personality of the trainers and level of knowledge from this school to contribute significantly in the field of NLP. The level of integrity from Heidi and Laureli is rare in this field, it is well worth anyone's while to go out of their way to choose these guys as their trainers.

Richard - Laureli and Heidi put NLP into such simple terms and easy to follow steps. I was amazed at how much more I learned in such a shorter timeframe than my previous training. It was amazing to learn from such great trainers and leaders, they are two of the best trainers I've seen in the world.

What is NLP?

If you could change or enhance anything in your life, what would it be?

The moment a person recognises the power of their minds, the individuality of their thinking, and how they have control over their lives - they can transform their world.

Once we understand how our patterns of emotions, beliefs, behaviours, and thoughts are created we can use this information to enhance what is working, change what is not and create new beneficial patterns that will help you in all areas of your life.

NLP is teaches how the **language** of your **mind** creates the **programs** you run in life.

Ultimately, with NLP you are learning how your mind works – and in turn other people's minds. In essence everything we interact with (see, hear, touch, taste, smell, think) creates a chemical reaction which triggers a response. What if you can learn how to purposefully alter those chemicals and therefore your responses? That is NLP.

This remarkable set of tools is based on the amazing discovery that in changing how you think can change what you think – and in changing how and what you think, you can dramatically transform the results you create in your life.

Benefits of Learning NLP

The tools of NLP can be used in all aspects of life and there are numerous benefits to learning NLP. Here we outline the six top reasons our students tell us they learned NLP.

CREATE CLARITY ABOUT THE FUTURE

Gain more insight into you by learning what is important, what you believe, value, and desire. With NLP you will learn to look toward the future with new eyes that allow you to see the endless possibilities, while creating goals and actions that are aligned.

COMMUNICATION SKILLS

Improve your interpersonal and intrapersonal communication skills. NLP will share with you powerful skills to build rapport, listen with curiosity, ask better questions, respect how another person, and overall communicate more effectively.

PERSONAL POWER & SELF LOVE

With NLP you will improve your relationship with yourself, learn how to get out of your own way, honour and respect yourself, and live with authenticity. In turn, your own personal power and self-love are delightfully sparked and ignited.

CHANGE INTERFERING BELIEFS & BEHAVIOURS

Sometimes we hold ourselves back through interferences in our beliefs, emotions, and behaviours. With loving kindness, you will learn and use NLP tools to help you to transform any blocks or barriers standing in your way of living a truly successful life.

BOOST CONFIDENCE AND SELF ACCEPTANCE

Each moment in our life contains learning and choice for our future outcomes. NLP will help you to uncover your own personal treasures and help you to enhance your confidence, build self-love, worth and self-acceptance in all ways to live your best life.

HELP OTHERS WITH COACHING SKILLS

Regardless of your desire for learning NLP, you will be able to help others with NLP. Through simple conversational tools, you can help reframe an experience, shift a belief, enhance someone's self-worth, and help them be their own best self.

NLP Certification

SECTION
02

What is NLP Certification?

NLP Certification has been available since the 1980s. Originally, the majority of people who learned NLP used the tools as a Practitioner in a therapeutic manner. Since then, NLP is taught to people for a variety of reasons – business, communication, personal growth, coaching and therapy. The historical course name of NLP Practitioner and Master Practitioner certification remain.

NLP for You

First and foremost, the NLP journey starts and ends with you. In NLP we know that you are in charge of your mind, therefore, your results. All NLP tools help to create a life filled with more wholeness and choice.

- Understand how you create and use the patterns of emotion, behaviour, and belief in your life.
- Enhance or change any patterns which will help you to live your best life.
- Improve your communication with yourself and with others.
- Motivate yourself to achieve your goals and desires.
- Understand how the language of the mind creates the programs of life - and how to change them when you desire.
- Live your life as a more authentic you - to get out of your way and be the best you can be.

NLP in Business

From a business perspective, NLP helps to align the Present State (where they are now), and the Desired State (where they want to be), of individual employees, team members, management and core with the Company Goals and objectives. Because NLP is built around modelling excellence, the versatile skills of NLP can be used in virtually every aspect of business:

- Goal Setting
- Marketing
- Customer Service
- Employee Morale
- Training
- Change Management
- Project Management
- Sales
- Recruitment
- Business Planning
- Negotiation
- Leadership
- Motivation
- Creative Design
- Flexibility & Growth Mindset

NLP with Others

Working with others is a desired outcome of many students. The modality of NLP can be used as a Coaching and Therapy tool to assist others in any aspect of life – career, communication, emotional, physical, mental, personal, and more. If you desire to use NLP as a Coach or Therapist, from learning NLP you will:

- Gain skills to establish and maintain a strong rapport with others
- Develop exquisite listening and dynamic questioning techniques
- Learn how to identify interferences and how to transform these blocks
- Be able to distinguish between conscious and unconscious patterns

WHY NLP COACH CERTIFICATION

While there are many benefits to choosing NLP as the modality for your coaching, we would like to highlight our top three priorities when we train Coaches:

You will gain valuable investigation tools with the use of rapport, dynamic questions, identifying unconscious filters, and a specific client-intake process.

Your NLP Toolbox will be filled with techniques that work directly with the unconscious mind to enhance what is working well, change what is not, and set your client up for future success.

Because of the skills you will build, you will be gaining a robust strategic method to work with clients. You'll know what to do, when to do it, how to do it, and most importantly, why to do it.

ICF Credentialling

The most sought-after professional coaches are credentialed by the ICF, the gold standard for Coaching worldwide.

The International Coach Federation (ICF) is the leading global organisation dedicated to advancing the coaching profession by setting high standards, providing independent certification, and building a worldwide network of trained coaching professionals.

The ICF offers the only globally recognised, independent credentialing program for coach practitioners. ICF Credentials are awarded to professional coaches who have met stringent education and experience requirements and have demonstrated a thorough understanding of the coaching competencies that set the standard in the profession. Achieving credentials through ICF signifies a coach's commitment to integrity, understanding and mastery of coaching skills, and dedication to clients.

The ICF accredits programs, like this Coach Certification training that deliver coach-specific training. ICF-accredited training programs must complete a rigorous review process and demonstrate that their curriculum aligns with the ICF Core Competencies and Code of Ethics.

Once you gain your ICF credentials, you can continue to obtain your annual requirements for Continuing Coach Education (CCE) with NLP Worldwide.

We encourage enrolment 2-4 months before your Level 1 training begins so you can complete, practice and embody the NLP Starter Training.

NLP TRAINING MANUAL

Your Training Manual is ready for you online when you enrol, and updates will always be made available to you for a lifetime. You can start perusing the materials, begin your Prac Starter training, set yourself up for success on your assessments and start learning NLP.

30 DAYS TO NLP

As a learning tool, you will access a copy of our text **30 Days to NLP**, written by your NLP trainers Dr Heidi Heron and Laureli Blyth. We want you to read through the book to familiarise yourself with some of the terminology and concepts. Everything in the book will be covered in detail and practiced during your training.

Prac Starter Training

We want you to hit the ground running when you enter the NLP training room. You can start your Prac Starter Training as soon as you are enrolled to gain new insights about the mind, NLP, and communication; skills you can start using immediately in life.

SELF PACED & GROUP LEARNING

For the most part you will move through the Prac Starter Learning in a self-paced manner. There are videos to watch, a book to read, and tools to practice.

Before your training, you will be invited to attend a 3 hour Zoom group call with your fellow students to ask questions and practice your skills before you even enter the training room.

WHAT IS THE PRAC STARTER TRAINING BASED ON?

NLP FUNDAMENTALS

A 3-hour training where you will learn about the history of NLP, the minds, and NLP presuppositions.

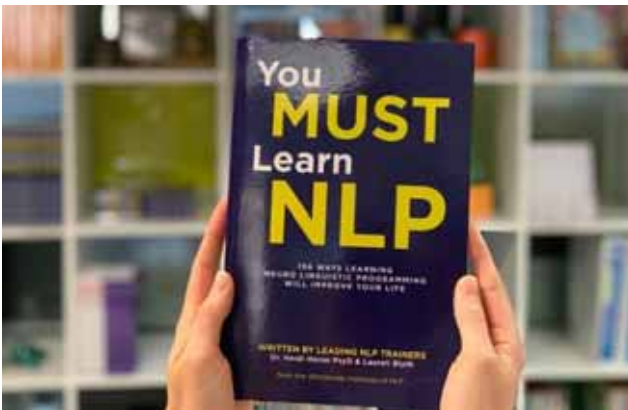

NLP COMMUNICATION ESSENTIALS

A 3-hour online learning where you will be introduced to the Core 5 NLP skills that will be used in your everyday life! Sensory acuity, rapport, meta model, eye accessing cues and Milton language.

Know Where You are Going

“Make a plan for your learning, set your intentions, know where you want to go – then stay open to receive.” – Dr. Heidi Heron

To assist you in setting intentions for the training and gaining a better understanding of your personal and professional goals with NLP, you will find two great resources on the Student Membership Site once you enrol for your training.

YOU MUST LEARN NLP

Written by your trainers Dr Heidi Heron and Laureli Blyth, the You Must Learn NLP book is a great one to skim through to find out all of the areas where NLP will fit into your life.

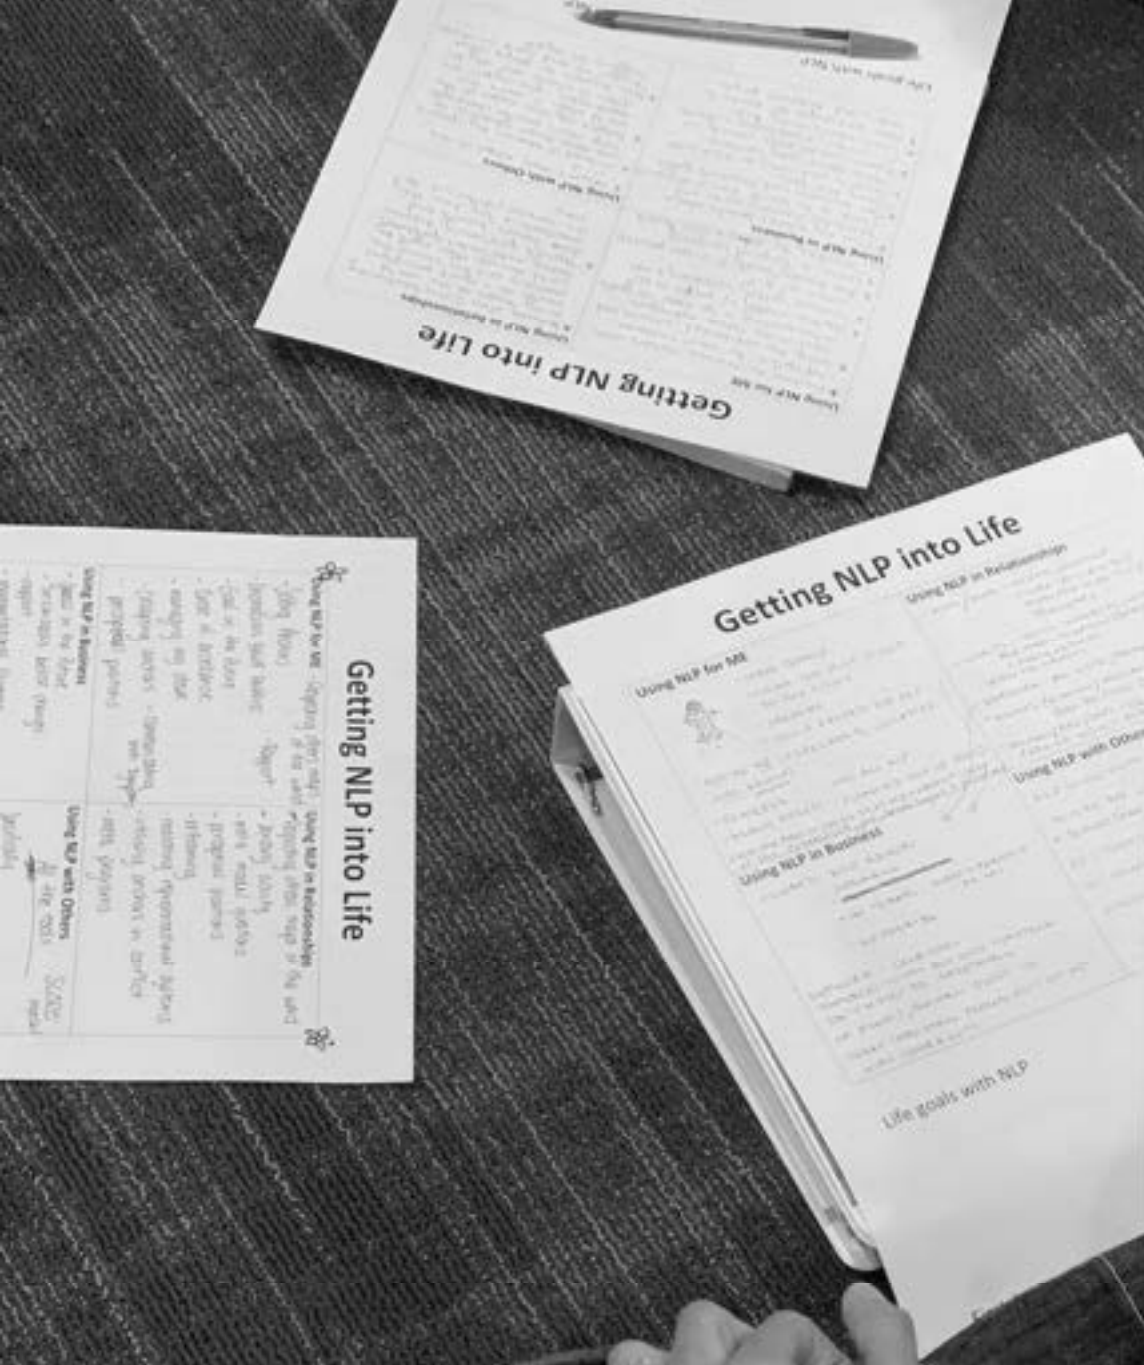

If you are looking to improve relationships, change your beliefs around money, enhance your health, develop better communication skills, or simply be a better you, you will learn more about how NLP will help you to improve your life in so many ways!

NLP SUCCESS MAP

The NLP Map to Success is a great tool for identifying what you want to achieve in the NLP training. You will be investigating your values in a few areas of life, creating goals using the NLP tool Well Formed Outcome, and getting to know yourself even better before attending the training.

We have found over the years, the clearer you are about your intentions and desires for the training the more you will get out of it personally and professionally.

The Learning Continues

You will have access to the Student Membership site from the day you enrol, then it will be regularly updated for your learning.

The quality of our training is based on the success of our students. We have learned that our students who excel the most with NLP are those who continue their learning outside of the classroom.

We have a variety of ongoing learning opportunities for you to get involved in (both online and in person), an exceptional NLP Graduates community, and support to ask questions, practice, and continue to develop your skills.

ONGOING LEARNING OPPORTUNITIES

Each month we facilitate opportunities for ongoing learning. You can connect in-person or online with fellow graduates to discuss topics, practice using your NLP tools, coaching, and being coached, coach mentoring, and attending supervision sessions if you are working with others.

Monthly Practice Groups

2-3 times per month you can attend a practice group to practice your NLP skills. Each session we look at a different topic from your NLP trainings, review the skill and practice with fellow graduates from NLP Worldwide.

Monthly Group Supervision

If you are working with clients (or desire to), you can attend 1-2 group supervision calls each month. In these Zoom calls we discuss clients, best practice, self-care, business, wins, challenges, and support each other professionally.

Quarterly Coach Swaps

You can develop your skills, help someone else, and get coaching of your own in our quarterly coach swaps. You will be paired with another NLPer at your same level, and over 3 months you will coach each other 3-4 times at a suitable time for you both.

NLP Community

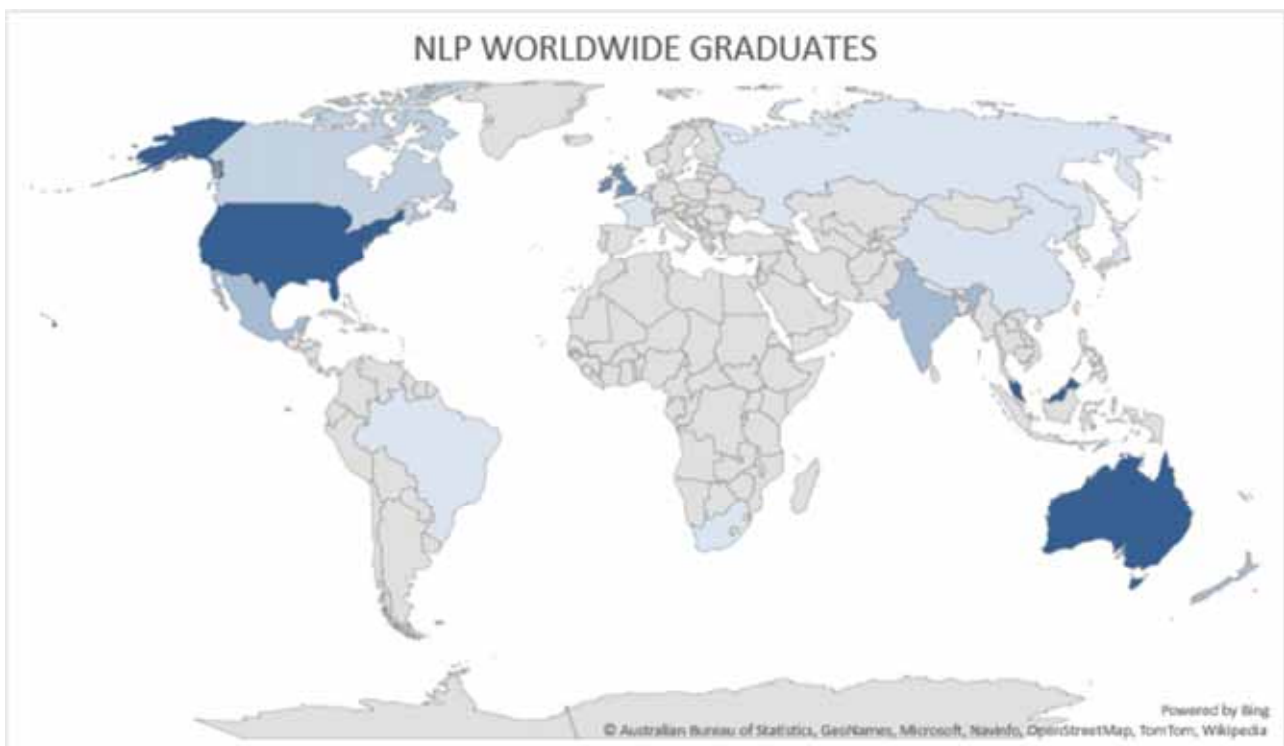

"To grow, surround yourself with people at your level or above your level." – Tony Robbins

Our NLP community globally is diverse, welcoming, supportive, and dynamic. Both with our NLP Worldwide Graduates Group on Facebook and our in-person & zoom events, you will be welcome into our NLP family with open arms.

Although we are spread throughout the world, our graduates are only a click away. There is always someone to answer a question, support your growth, and have a conversation with like-minded individuals.

We celebrate wins, practice, learn, and grow with each other and provide a lot of support to one another in and out of the training room.

Getting NLP in Your Muscle

On the final day of your training, we specifically look at how you will be using NLP in your life, goals you have, and ways you can embrace NLP to get it into your muscle. There is a New Guinea proverb "*knowledge is only a rumour until it is in your muscle*". It is our intention to help you to move from the training room and into life with skills and knowledge of how to use your new NLP toolbox in every way you desire.

When you know better, you can do better; and we want to help you to do better. Through your training you will be investigating how to use NLP with yourself, within business, and with others. Every part of your life can benefit from the tools of NLP, and it is our intention to assist you to embody the aspects of NLP that will help you to transform old patterns, enhance what is working and live your best, authentic life!
